State of North Carolina Floodplain Management Staff and NC Association of Floodplain Managers

INVITE *YOU* TO:

*2009 – Summer
Floodplain Management
Training Workshops
for
Community Floodplain
Administrators*

**Presenting 3 different
workshops at each location**

Fayetteville	June 17 - 18
Kernersville	June 24 - 25
Franklin	July 7 - 8

WHO SHOULD ATTEND?

These workshops are separated into 6 modules; each location will deliver 2 modules (listed under “Schedule” in the center column) with in-depth training designed to be discussed and reviewed in greater detail than any basic course. Developed and real-life scenarios will be examined, and exercises will be conducted in each module to increase floodplain administrator’s understanding of the rules and regulations and recognize when and how to apply them.

Attendance at one of the workshops by at least one representative from each community is advised. Please share this invitation with planners, building inspectors, zoning officials, elected officials, etc.

PRESENTERS

Milton Carpenter, CFM, NFIP Planner
mcarpenter@ncem.org 919-715-5711 x103

Steve Garrett, CFM, Outreach Planner
sgarrett@ncem.org 919-715-5711 x118

DESCRIPTION

Post Disaster Duties

Response and recovery responsibilities of the floodplain administrator.

LOMCs

The process for changing and correcting flood insurance rate maps, including data requirements and discussion of acronyms.

Community Rating System (CRS)

H&H

Introduction to the production of flood studies, including the properties of floodwaters, the watershed concept, discharge calculations, and how these relate to higher standards.

Insurance

Explanation of the relationship between floodplain management and flood insurance. Basics of underwriting and rating criteria, increased cost of compliance, and basic claim procedures.

Higher Standards

Overview of a selection of higher standards communities may adopt, including prohibition on fill, subdivision regulations, enclosure limits, critical facilities, and more.

Manufactured Homes

Discusses regulatory requirements for the placement of manufactured homes, the site review process, installation and enforcement issues, and recreational vehicle topics.
